CCW PROTECTION BOARD-HS

DESCRIPTION

CCW Protection Board-HS is a heavy duty modified bitumen protection board consisting of a medium weight fiberglass mat with a high quality SBS (Styrene-Butadiene-Styrene) rubber and asphalt blend. This elastomeric asphaltic blend lends elasticity and flexibility to the sheet. The inorganic fiberglass reinforcing provides high tensile strength, dimensional stability and tear resistance.

CCW Protection Board-HS is designed to be installed as a protection course in the CCW-500R System.

TYPICAL USE

CCW Protection Board-HS is used as a protection course on horizontal surfaces to protect the CCW-500R Membrane System from damage by foot traffic and physical abuse from other trades.

Typical uses include plaza decks, inverted roofing systems, parking decks with asphalt overlayers and other horizontal surfaces to which waterproofing membranes have been applied.

INSTALLATION

Embed in hot, liquid CCW-500 and over lap 2 - 3 inches. Seal all laps with CCW-500.
