

Sedum 'Autumn Joy'

Common Name:	Stonecrop
Height:	24 in.
Width:	24 in.
Bloom Time:	Late Summer
Flower Color:	Pink
Hardiness Zone:	4a
Light:	Full Sun
Soil:	Loamy
Moisture:	Dry

Stonecrops are a large family of over 600 species of succulents, very easily grown in quick-draining soils and sunny spots. Flower clusters will attract welcome visits from butterflies. 'Autumn Joy' ('Herbstfreude') is an upright cultivar, with grayish-green fleshy leaves and large domes of bright pink flowers which gradually soften to a coppery-pale pink through winter.

Sedum 'Frosty Morn'

Common Name:	Stonecrop
Height:	24 in.
Width:	18 in.
Bloom Time:	Summer thru Fall
Flower Color:	Pink
Hardiness Zone:	4a
Light:	Full Sun
Soil:	Sandy Loam
Moisture:	Moist

This recent introduction from Japan is similar in habit to "Autumn Joy," but its foliage is variegated, each fleshy leaf edged in creamy white. And the flowers, which open in late summer, are pale pink, maturing white. Use this showy succulent as a bright accent in a sunny border. It looks especially fetching with ornamental Grasses. Stonecrops are a large family of more than 600 species of succulents, very easily grown in quick-draining soils and sunny spots. Flower clusters will attract welcome visits from butterflies. Curiously, few species of this large and diverse genus are seen in American gardens. This may be because many of them are rock garden plants, and rock gardens have not been in vogue for many years in the U.S. The foliage is fleshy, and plants prefer well-drained soils and full sun. In the South, a number of rock garden species are at their finest during the cool fall, winter, and spring months and barely hang on during the summer. Partial shade is beneficial south of Zone 6. All tolerate drought and require little maintenance. Stonecrops are succulents that vary greatly in size and habit, from 2' border plants to prostrate ground covers. All prefer full sun and well-drained soil.

Sedum 'Matrona'

Common Name:	Stonecrop
Height:	24 in.
Width:	18 in.
Bloom Time:	Late Summer
Flower Color:	Pink
Hardiness Zone:	4a
Light:	Full Sun
Soil:	Loamy
Moisture:	Dry

'Matrona' produces strong, shiny red stems that hold large, pale pink flower heads that last well into the fall season. Surrounded by deep gray foliage and noted for its very upright habit, it was a chance seedling found by Ewald Hugin in Germany. 'Matrona' is named for a grandmotherly figure.

Sedum 'Vera Jameson'

C A R L I S L E C O A T I N G S & W A T E R P R O O F I N G

Sedum 'Vera Jameson'

Common Name:	Stonecrop
Height:	12 in.
Width:	18 in.
Bloom Time:	Late Spring
Flower Color:	Pink
Hardiness Zone:	4a
Light:	Full Sun
Soil:	Loamy
Moisture:	Dry

Stonecrops are a large family of over 600 species of succulents, very easily grown in quick-draining soils and sunny spots. Flower clusters will attract welcome visits from butterflies. 'Vera Jameson' is an upright branching variety, with blue-green fleshy leaves taking on a handsome red cast in the cool weather of fall.

Sedum caucicum

Common Name:	Stonecrop
Height:	3 in.
Width:	12 in.
Bloom Time:	Mid Summer
Flower Color:	Pink
Hardiness Zone:	4a
Light:	Full Sun
Soil:	Sandy
Moisture:	Dry to Moist

This cute little plant has low growing and slow spreading scalloped blue-gray leaves that are edged in pink. The pink flowers age to red in mid to late summer to add even more interest to the already attractive foliage. Plant this in groups in the rock garden or on the border for an attractive accent.

Sedum cauciculum 'Bertram Anderson'

C A R L I S L E C O A T I N G S & W A T E R P R O O F I N G

Sedum cauciculum 'Bertram Anderson'

Common Name:	Bertram Anderson Stonecrop
Height:	6 in.
Width:	24 in.
Bloom Time:	Summer thru Fall
Flower Color:	Purple
Hardiness Zone:	3a
Light:	Full Sun
Soil:	Sandy
Moisture:	Dry to Moist

Forms a low-growing mat of trailing, deep burgundy-black foliage set with purple-red blooms in mid-to-late summer. This is an older variety but still outstanding as edging, in containers or the rock garden. Grow it with some Sedum Angelina for a dramatic, drought-tolerant combination.

Sedum divergens

Common Name:	Pacific Stonecrop
Height:	3 in.
Width:	10 in.
Bloom Time:	Summer thru Fall
Flower Color:	Yellow
Hardiness Zone:	5a
Light:	Full or Part Sun
Soil:	Sandy
Moisture:	Dry to Moist

These succulent groundcovers have abundant stems of star-shaped flowers. Very useful in the rock garden, tolerating dry ground in partial shade. This compact species is prevalent in the Columbia River Gorge. Rounded leaves on short, upright stems are like jade-green bubble-alga, maroon-red in winter. Bright yellow flowers in summer.

Sedum hispanicum 'Purple Form'

C A R L I S L E C O A T I N G S & W A T E R P R O O F I N G

Sedum hispanicum 'Purple Form'

Common Name:	Blue Carpet Stonecrop
Height:	3 in.
Width:	12 in.
Bloom Time:	Late Summer
Flower Color:	Pink
Hardiness Zone:	3a
Light:	Full or Part Sun
Soil:	Sandy
Moisture:	Dry

Blue-gray foliage in summer then changing to deep blue and lovely hues of purple in colder weather. In late summer, foliage is completely covered with small pink star-shaped flowers. Extremely heat drought tolerant. A good plant for walkways, rock gardens and container plantings.

Sedum kamtschaticum k. variegatum

C A R L I S L E C O A T I N G S & W A T E R P R O O F I N G

Sedum kamtschaticum k. variegatum

Common Name:	Striped Kamtschatka Stonecrop
Height:	6 in.
Width:	18 in.
Bloom Time:	Mid Summer
Flower Color:	Yellow
Hardiness Zone:	5a
Light:	Full or Part Sun
Soil:	Sandy
Moisture:	Dry

This delightful and easy-to-grow form of *S. kamtschaticum* is not as aggressive as some selections of this species. This clumping form of *S. kamtschaticum* emerges in early spring with dozens of grass-green rosettes held horizontally on the end of 6" long stems. As the temperatures warm, the edges of the leaf take on a nice creamy gold border. The clumps are topped with sprays of bright yellow flowers held just above the foliage in midsummer...a real winner.

Sedum spurium 'John Creech'

Common Name:	Stonecrop
Height:	2 in.
Width:	16 in.
Bloom Time:	Early Summer
Flower Color:	Pink
Hardiness Zone:	4a
Light:	Full Sun
Soil:	Sandy
Moisture:	Dry

This wonderful and easy-to-grow groundcover is named after the former director of the US National Arboretum John Creech. Dr. Creech discovered the plant in the Siberian Academ Gorodok Gardens in 1971. This is not just any *S. spurium*, but a rare small foliage and pink flowered form. The small scalloped green leaves of this weed-smothering groundcover are topped with pink flowers in fall. We think you'll really enjoy this durable plant.

Sedum spurium 'Red Carpet'

C A R L I S L E C O A T I N G S & W A T E R P R O O F I N G

Sedum spurium 'Red Carpet'

Common Name:	Stonecrop
Height:	4 in.
Width:	24 in.
Bloom Time:	Mid Summer
Flower Color:	Red
Hardiness Zone:	4a
Light:	Full Sun
Soil:	Sandy
Moisture:	Dry

Sedum Red Carpet is a wonderful ground cover that is a little different from the rest. With a height of 3-4" and a spread of 24", its red blossoms flower from May to September. The foliage is a dark red with green and produces a wonderful fall color. Sedum Red Carpet needs to be planted in full sun in well-drained soil. It will tolerate most soil types, and is drought resistant. A great choice for beds and borders and excellent as cut flowers. It is also a great butterfly and bee attractor, and is disease resistant.
