**LIMITED WARRANTY**

Carlisle Coatings & Waterproofing, Incorporated (Carlisle) warrants this product to be free of defects in workmanship and materials only at the time of shipment from our factory. If any Carlisle materials prove to contain manufacturing defects that substantially affect their performance, Carlisle will, at its option, replace the materials or refund its purchase price.

This limited warranty is the only warranty extended by Carlisle with respect to its materials. There are no other warranties including the implied warranties of merchantability and fitness for a particular purpose.

Carlisle specifically disclaims liability for any incidental, consequential or other damages including, but not limited to, loss of profits or damages to a structure or its contents arising under any theory of law whatsoever.

The dollar value of Carlisle's liability and buyer's remedy under this limited warranty shall not exceed the purchase price of the Carlisle material in question.

## CCW Waterproofing and Drainage Solutions

### Air & Vapor Barriers

- CCW-705, Barriseal™, Barritech™ VP
- CCW-705 Air & Vapor Barrier Strips

In protecting your interior space from outside Vapor and Air transmission, CCW offers three distinct product categories that provide a “Single System Solution.” CCW Air & Vapor Barriers are asphalt-based sheet-and spray-applied membranes that provide the convenience of quick application and the lasting benefits of quality materials. The CCW Air & Vapor Barrier Systems consist of CCW-705 fully adhered sheeting, Window & Door Flashing and Thru-Wall Flashing (TWF). Barriseal, a water-based asphalt emulsion, provides a spray-applied medium for large-scale jobs and difficult-to-seal substrates.

### Parking Deck

- CCW Deck Coating

CCW supplies a wide variety of elastomeric polyurethane deck coating systems. These systems serve to protect the structure by waterproofing the concrete substrate while providing an attractive wearing surface. Each system consists of a durable, skid-resistant wearing surface and a waterproofing layer, which protects the above-grade decks from the damaging effects of water and chlorine ion penetration, thereby preventing the water from penetrating the spaces below. Special, low-VOC compliant coatings are also available and all CCW deck coating systems meet the requirements of almost any project — from apartment balconies to high-traffic vehicular decks.

### Lagging Walls

- CCW MiraDRAIN® 6000
- CCW MiraCLAY®

CCW MiraCLAY is a specially constructed system that utilizes sodium bentonite clay. The CCW MiraCLAY geotextile panel consists of sodium bentonite clay encased between two layers of woven and non-woven, puncture-resistant polypropylene fabric. CCW MiraCLAY is needle-punched together using the Infrabond™ process. In a hydrated state, CCW MiraCLAY has low permeability and high resistance to chemicals. CCW MiraCLAY is ideal for property line or lagging applications when used in combination with CCW MiraDRAIN 6000/6000XL.

### Concrete Roof Decks:

- Extruded Insulation
- CCW-500R
- CCW Protection Board

CCW-500 is a single-component, hot-applied, rubberized asphalt compound that cures to form a strong, flexible, fully adhered, monolithic waterproofing and roofing membrane. The double-layer, reinforced CCW-500R system adheres tenaciously to concrete roof decks, vertical or horizontal, to ensure that water will not migrate beneath the membrane in the event of physical damage. CCW-500R allows for applications on a wide variety of substrate conditions and enhances crack bridging capability.

### Roof Plaza Deck:

- CCW MiraDRI 860
- CCW MiraDRAIN 9000
- CCW LM-800XL/CCW-201

For roof deck waterproofing, in conditions where a hot-applied system may not be the most ideal, Carlisle Coatings & Waterproofing provides the solution with CCW MiraDRI 860/861. With factory-controlled properties, peel-and-stick technology and ease of use, CCW MiraDRI 860/861 is the easy choice for contractors and applicators alike.

### Foundation Walls:

- PT304/CCW-201
- CCW MiraDRI 860
- CCW MiraDRAIN 6200

CCW offers a wide variety of waterproofing products used for foundation walls, such as CCW MiraDRI 860/861, CCW MiraCLAY and Barricoat. The protection provided by these waterproofing products, used in conjunction with CCW MiraDRAIN, provide a complete waterproofing system second to none.

### Plaza Deck

- Hanover Pavers
- Foamular®
- Extension Insulation
- CCW MiraDRAIN 9000
- CCW-500R

Plaza Decks Systems offers an exposed functional working surface while also providing waterproofing protection. A total Plaza Deck System can be achieved with the variety of products offered by CCW, including a warranty that covers everything from the waterproofing membrane to the pavers. The CCW Plaza Deck System includes the CCW-500R Hot-Applied System, CCW MiraDRAIN Drainage Composite, Foamular insulation and your choice of pavers.
